Designed for policymakers, renewable energy developers, and tech-savvy environmentalists, this megaproject could become the Middle East's blueprint for grid resilience.

The new hybrid storage system developed in the HyFlow project combines a high-power vanadium redox flow battery and a green supercapacitor to flexibly balance out the demand for ...

In today's rapidly evolving energy landscape, the Sophia Photovoltaic Energy Storage Cabinet Solution stands out as a game-changer. Designed to address the intermittent nature of solar power, this ...

An energy storage cabinet pairs batteries, controls, and safety systems into a compact, grid-ready enclosure. For integrators and EPCs, cabinetized ESS shortens on-site work, simplifies ...

Imagine a storage system that acts like a Swiss Army knife for energy - adaptable, reliable, and ready for anything. The Sophia lithium battery cabinet does exactly that, serving industries ...

SOPHIA is an EU-funded Horizon Europe project that aims to implement advanced digital solutions in end-of-life solar panels, involving the full value chain in order to increase their ...

SOPHIA is an EU-funded Horizon Europe project that aims to implement advanced digital solutions in end-of-life solar panels, involving the full value chain in order to increase their current reuse, repair ...

Imagine a storage system that acts like a Swiss Army knife for energy - adaptable, reliable, and ready for anything. The Sophia lithium battery cabinet does exactly that, serving industries from solar farms ...
