How much liquid fuel does Sudan produce a day?

Sudan produced an average of about 70,000 barrels per day(b/d) of total liquid fuels in 2023,and South Sudan produced an average of about 149,000 b/d. Sudan's total liquid fuels production has steadily and significantly declined over the past decade because upstream exploration and development has been lacking in the country.

Does Sudan have wind and solar power?

Sudan has significant wind and solar energy resourcesthat are largely untapped. According to a World Bank study,Sudan has significant wind power potential along its coast on the Red Sea and in the Northern State. Sudan also has solar power potential,but renewable power tends to be small in scale and used for off-grid solutions.¹⁶

Why does South Sudan have a low electricity rate?

South Sudan has one of the lowest electrification rates in the world; only 8% of its population had access to electricity in 2021,according to the latest estimates from the World Bank. Those connected to the power network experience frequent blackouts or forced load shedding,which makes standby generators necessary to meet electricity needs.¹⁸

Why is liquid fuel production declining in South Sudan?

Sudan's total liquid fuels production has steadily and significantly declined over the past decade because upstream exploration and development has been lacking in the country. Growth in South Sudan's total liquid fuels production has been relatively flat,averaging about 153,000 b/d over the past decade.

South Sudan Energy Storage Market (2025-2031) | Segmentation, Industry, Forecast, Trends, Competitive Landscape, Growth, Companies, Outlook, Size & Revenue, Value, Analysis, Share

Located in Sudan, this project addresses the region"s inadequate grid supply by implementing an integrated "photovoltaic + energy storage" solution to provide clients with stable, clean power.
