Will Southern Company's battery energy storage system revolutionize Alabama's energy landscape?

This article originally published on Zacks Investment Research (zacks.com). Southern Company's SO Alabama Power unit is set to revolutionize the state's energy landscape with the development of first-ever utility-scale Battery Energy Storage System ("BESS").

Does southern power have a battery-based energy storage facility?

Southern Power, a leading U.S. wholesale energy provider and subsidiary of Southern Company, has been awarded a 20-year power purchase agreement by Southern California Edison to add a battery-based energy storage resource at Southern Power's Garland Solar Facility in California.

Will Southern Company extend life of three coal-fired power plants?

New filings in Mississippi and Georgia show Southern Company's utility subsidiaries in those states are seeking to extend the life of three coal-fired power plants, jeopardizing the company's ability to achieve the net-zero emissions target it promised to investors.

Will Southern Company address a energy shortfall?

While Southern Company struggles to accommodate the new load growth that it is forecasting will come, its electric subsidiaries in Alabama, Georgia, and Mississippi have blocked or delayed solutions to increase distributed energy and energy efficiency, which could help address an energy shortfall, if it materializes.

Explore Southern Company's strategic investments and partnerships in battery storage, powering a sustainable and reliable energy future. Learn about their BESS initiatives.
