Switzerland's energy scene is like a precision watch - every component must work seamlessly. With 75% of its electricity already from renewables *, the Swiss now face a "good ...

Pumped hydro storage is one of the oldest energy storage technologies and the one with the biggest commercially used capacity installed. Below is a list of the currently in Switzerland installed Pumped ...

Well, they're now making waves in energy storage. The Federal Council just launched Europe's most ambitious battery storage tender - a 900 MW capacity push to solve their Alpine energy puzzle.

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity.

Pumped hydro storage is one of the oldest energy storage technologies and the one with the biggest commercially used capacity installed. Below is a list of the ...

"This project helps to stabilize the electricity grid in Switzerland and to optimize the management of our own energy and power capacity in Wettingen."

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland ...

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...
