Numerous large-scale energy storage projects using novel technology are being deployed in China. Last week, it was reported that the first half of the ...

On the 6th of June, the first phase of the Longquan Energy Storage project was successfully connected to the grid. Located near Longquan, Zhejiang Province, China, the first phase ...

The world's first large-scale semi-solid state energy storage project was successfully connected to the grid in China on June 6. The 100 MW/200 ...

This is the largest semi-solid battery energy storage project worldwide to date, marking a critical breakthrough in the commercial application of solid-state energy storage battery technology.

As IEEE Spectrum pointed out in January, it's not realistic to look for solid-state batteries in production vehicles anytime soon.

The world's first large-scale semi-solid state energy storage project was successfully connected to the grid in China on June 6. The 100 MW/200 MWh installation is the first phase of the ...

Guangdong province launched its first semi-solid-state energy storage battery production line on Friday. Guangdong Energy Group, the initiator, stated that it is also the world's first mass ...

The world's first large-scale semi-solid state energy storage project was successfully connected to the grid in China on June 6. The 100 MW/200 MWh installation is the first phase...
