How is Uzbekistan achieving its solar power target?

Uzbekistan has made a positive effort toward that end, including by setting clear targets and reforming the energy sector and has been progressing toward achieving the solar power capacity target of 4 GW by 2026 and 5 GW by 2030.

Why is Uzbekistan so energy-intensive?

Uzbekistan remains one of the most energy-intensive economies in the world. Energy use is largely based on fossil fuels, although the country has significant RE potential in solar and wind. Natural gas makes up to 83 percent of total primary energy consumption and more than 80 percent of the electricity mix.

Does Uzbekistan need energy storage?

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy storage, with a 300 MW lithium-ion system debuting in 2024 and a goal of 4.2 GW storage capacity by 2030. The Role of Energy Storage in Renewable Energy

What is the Uzbekistan energy project?

7. The Project builds on the World Bank energy program in Uzbekistan by scaling up the private investment and commercial financing, diversification of power mix from domestic resources (solar), clean energy transition and decarbonization.

The main purpose of this roadmap is to guide policy making at all levels to maximise the use of solar energy in Uzbekistan, and to serve as a precursor for a national solar energy strategy.

"Today, we can confidently say that more than 20 large-scale projects in solar, wind and battery storage systems are being implemented ...

In this article, I will share with you what I've collected this June, including a clear overview of government policies, market opportunities, and ...

The Minister also emphasized that in 2025, the country plans to commission an additional 3.5 gigawatts of renewable energy capacity, as well as 1.8 gigawatts of energy storage ...

The Project builds on the World Bank energy program in Uzbekistan by scaling up the private investment and commercial financing, diversification of power mix from domestic resources ...

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy storage, ...

To enhance the use of solar energy resources in Uzbekistan, we recommend the government consider incorporating, as appropriate, all measures listed in the roadmap into its solar energy strategy toward ...

"Today, we can confidently say that more than 20 large-scale projects in solar, wind and battery storage systems are being implemented across the country," said Minister of Energy Jurabek...
