The need to co-optimize storage with other elements of the electricity system, coupled with uncertain climate change impacts on demand and supply, necessitate advances in analytical tools to reliably ...

States can establish energy storage procurement targets to jump-start the development of energy storage systems. These targets set a required ...

Ever wondered why energy storage projects are suddenly the "cool kids" of the renewable energy playground? From Tesla's Megapacks to California's record-breaking ...

During the 14th Five-Year Plan period, China's energy storage technology mix witnessed noticeable changes where pumped hydro storage accounted for less than 40% for the first ...

States can establish energy storage procurement targets to jump-start the development of energy storage systems. These targets set a required amount of energy storage, typically expressed ...

The amendment to the Construction Law Act of 4 December 2025 (the "Amendment") introduced new solutions relating to the construction process for energy storage systems. It specifies ...

Article 706 Similar to 690, the changes for Energy Storage Systems, Article 706, add clarification to the requirements, rather than significant changes to the rules. Article 706 is still ...

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...
