Which energy company is launching a Bess system in Ireland?

Last July, Neoen Renewables Ireland Ltd, a French renewable energy company, announced a 149.6MW BESS on an 8.5ac site near Portarlington, Laois. Just last week, the ESB opened a 75MW/150MWh BESS at the Poolbeg Energy Hub in Dublin. The system is Ireland's largest so far and is part of its EUR300m BESS portfolio.

How many Bess projects are there in Ireland?

Currently, around 17 BESS are connected to the grid, with many more filtering their way through the planning system around the country. Over the past number of weeks, the Irish Farmers Journal has been contacted by a number of farmers who have been approached by developers looking to build BESS projects on their land.

How does a Bess project work?

BESS projects collect energy from renewable sources, such as wind and solar panels, or from the electricity grid, storing it in large battery storage units. These batteries release the energy back to the grid when needed - for instance, during peak demands, helping to balance supply and demand, and improve grid stability.

Are Bess developments smart?

BESS developments are smart, and while they don't solve problems with congested or weak electricity grids in an area, they do allow for better management of how the grid works; potentially unlocking new areas for renewable energy developments.

New wholesale electricity market rules have been introduced in Ireland, designed to allow battery storage assets to participate directly. From 11 ...

Search all the commissioned and operational battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Ireland with our ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...

In our latest Energy Essentials podcast we introduce the Battery Energy Storage Systems (BESS) market in Ireland and Northern Ireland, discuss the key challenges facing it and ...

With wholesale markets opening up, BESS are now positioned to capture value from what remains a structurally tight Irish system. Unlike many European counterparts, ...

With wholesale markets opening up, BESS are now positioned to capture value from what remains a structurally tight Irish system. Unlike many European counterparts, Ireland is one of ...

TSG Ireland supplies and installs high-quality battery storage equipment, managing all aspects of the project including civil works, infrastructure, cabling, grid connections and commissioning.
