As a guide, the price for a good 6.6kW system in Brisbane is between \$5,000 - \$8,500. The table below shows prices for different system sizes in Brisbane: Many households in Brisbane will likely benefit from installing a battery with their solar panels. The table below shows average prices for solar panel and battery systems in Brisbane:

Why is Queensland leading the way in solar power installation?

To be precise, the state is leading the way in the installation of rooftop solar power systems, which comes to about 42% of households having opted for residential solar generation. The reason behind the generation of the highest solar power in Queensland is sun exposure, affordable installation costs, and government feed-in-tariffs.
